

Ink Mill Corporation

Inkjet Primers

Ink Mill Brand Inkjet Primers

Glass Boost – Is a primer developed to promote adhesion when printing UV ink to glass, also works well as a primer for just about everything else as well.

Plastiboost – Primer manufactured to de-static plastic sheets as well as clean them and also promotes adhesion to substrates.

Exceptional Characteristics– Our special formulated Primers help promote adhesion to different substrates, glass, plastics, metals, and other substrates. It also helps de-static, clean, and prepares the surface to receive the ink.

Service – We can package your ink anyway you like, by the liter, gallon, bag, or cartridges. We can also privately label the ink for you.

Solvent, UV, or LED? – With our experience and years in the inkjet industry, we can help you make the right choice of primers for your set of applications.

Questions – Please contact Ink Mill directly or one of our distributors.

EXPERIENCE

Ink Mill's engineers and lab technicians have over 30 years experience developing and manufacturing inkjet OEM inks. This experience allows us to understand the characteristics of the ink and printers.

QUALITY

Ink Mill has tighter specifications on the ink than that of the OEM ink. We also spend a considerable amount of time finding the best materials and making sure that those chemicals are consistent from batch to batch.

CUSTOMER SERVICE

At Ink Mill we believe in helping our customers and in return our customers will help us. Our service is unmatched in the industry. We can help you do just about anything all you have to do is ask.
